Your air cleaner may "snap" or "pop" when first plugged in. This is a normal and transient situation which may be caused by moisture trapped inside the filter pad during transit which will quickly and permanently correct itself after adequate airflow dries out the media pad.

Only GENUINE Replacement Media Pads should be used in your air cleaner. Use of any other material, such as oiled fiberglass, may cause damage to the air cleaner and will VOID this Warranty.

Please contact your heating and air conditioning Dealer to order GENUINE Replacement Media Pads.
